Regular Price: ~~$1295.00~~
Discounted Price: $750.00

Certified Scrum Master (CSM) is a designation provided to someone who completes the Learning Objectives of this course, demonstrates the knowledge to perform the Scrum Master role, and passes the CSM exam from the Scrum Alliance.

In this complex and uncertain world, Business Agility is the only way to get through. However, it requires everyone -- from team-level execution and delivery to higher-level strategy, governance, and leadership, to understand agile principles and be educated about agile frameworks like Scrum.

This course provides the learners with the knowledge of Scrum Framework including the Roles, Events, and Artifacts. The course follows the Scrum Guide written by the creators of Scrum. CSM certified Scrum Masters are able to use Scrum in their organizations and thereby, lead and support Agile Transformations using Scrum to achieve success, regardless of their title in the organization.

Curriculum

• Agile Overview
• Agile values & principles – how Scrum aligns with them
• Scrum Overview – Scrum Framework
• The roots of Scrum
• Where to use Scrum
• Defined Process Control vs Empirical Process Control
• Scrum Values
• The Scrum roles: Product Owner, ScrumMaster, and Developer

- The Rights, Responsibilities, Characteristics and Authority of each role.
- Scrum Artifacts – Product Backlog, Sprint Backlog, and Increment
- Product Backlog Refinement
- Scrum Events – Sprint, Sprint Planning, Daily Scrum, Sprint Review, and Sprint Retrospective
- Definition of Done
- Scrum Master role in a scaled agile environment
- Scrum Master Competencies – Facilitating different events, Coaching the Development Team, Supporting the Product Owner and the Organization.
- Scrum Master as a Servant Leader
- Introduction to User Stories and Estimation Techniques
- Scrum Simulation

Learning Objectives

Upon completing the CSM course, learners are able to:

1. Explain how Scrum is related to and aligned with the Agile Manifesto and Agile Principles.
2. Apply Scrum Values and describe how these Values are present in Scrum Framework.
3. Explain the characteristics of Scrum Master, Product Owner and Development Team roles in Scrum.
4. Discuss the roles of Scrum Master, Product Owner, and Development Team.
5. Summarize the responsibilities of Scrum Master, Product Owner and Development Team in different Scrum Events - Sprint Planning, Daily Scrum, Sprint Review, and Retrospective.
6. Describe the activities done in different Scrum Events - Sprint Planning, Daily Scrum, Sprint Review, and Retrospective.
7. Identify the Scrum Artifacts and describe each one.
8. Create "Definition of Done" and its purpose for a Development Team.
9. Explain Scrum Master Core competencies and how Scrum Master uses these competencies to make their teams high performing teams.
10. Explain Scrum Master's role in a scaled agile environment.
11. Explain how Scrum Master supports his/her organization going through Agile Transformation.
