SAFe Training Course with Product Owner/Product Manager Certification

During this two-day training course, attendees will develop the skillsets needed to guide the delivery of value in a Lean enterprise—and learn about the activities, tools, and mechanics used to manage backlogs and programs—by becoming a *SAFe® 4 Product Owner/Product Manager (POPM).* Attendees will also gain an in-depth understanding of the Agile Release Train (ART), how it delivers value, and what they can do to effectively perform their role.

They will learn how to apply Lean thinking to write Epics, break them down into Features and Stories, plan and execute Iterations, and plan Program Increments. Finally, attendees learn about the Continuous Delivery Pipeline and DevOps culture, how to effectively integrate as Product Owners and Product Managers, and what it takes to relentlessly improve the ART.

Attending the class prepares individuals to take the exam and become a certified SAFe® 4 Product Owner/Product Manager. The price of the 2-day training course includes the cost of the certification exam and one year of membership to access the Scaled Agile Platform. Exam retakes are possible; but Scaled Agile Inc requires an additional fee for exam re-takes.

About Your Trainer
